Sunspots Research Data Log

Recording Area Values - Write the number of pixels you painted on each of the images for each day in the boxes to the right of the date. Each day's areas make a point on your graph. The ratios of x -ray to sunspot areas are measures of correlation. Do the ratios fall within a small range of values?

Date	Sunspots	X-ray activity	Ratio of X-ray area to
Bato	(number of pixels)	(number of pixels)	Sunspot area
	(number of pixers)	(manner or pintore)	Surispot area
