

Writing assignment due Oct. 9

From the reading assigned for Oct. 2, chapter 4 (pp. 114-141), please write in-class (Oct. 2) your one-paragraph responses to the following two prompts:

1. Explain in your own words *how auroras are formed* and *their connection to the Sun*.

2. Choose two photographs from the chapter, and then answer one or both of the questions (your choice):

What is different or similar in the science involved in creating such displays?

What makes the two photos different or similar in the way they inspire or impress you?

Following up on the in-class Oct. 2 discussion of poster topics, for next week (Oct. 9):

3. Please submit *the question you want to try to answer* with your poster, and *whom you intend to partner with* on the poster.
