

A banner with a background of a bright orange and red solar flare or sun surface. The text "Energy from the Sun" is written in a large, white, sans-serif font across the center.

Energy from the Sun

Solar Science and Solar Energy

We want to hear from you!

Take Home Assignment for December 3rd

Part II of our Workshop will be on Saturday, Dec. 3rd at SMUD in Sacramento. Between now and then we'd like you to: 1) create a plan for integrating what you have learned in the Workshop into your practice and 2) implement your plan at your school.

Please include the following in your lesson plan:

- Grade level
- General description of what you taught and how you adapted the Workshop materials for your own use
- Materials
- Time required
- Standards connections
- Short reflection on how you felt the lesson/activity went
- If you'd like, provide your email contact for Energy Workshop colleagues to follow up with you

If you plan to use *Energy from the Sun* lessons/activities to conduct professional development with your teaching colleagues, you can create a plan for them, implement training and share your results. If you need additional materials to do this, please contact Ruth at ruthp@ssl.berkeley.edu.

One or two pages will provide enough detail for your fellow teachers to see what you had in mind for your work with students or your fellow teachers.

We would like to hear about your experience at the follow-on Workshop on Dec 3rd. **Please send us your plans via email (karena@ssl.berkeley.edu) by November 18th** so we can post them to our website for others to see.

During the Workshop we will set aside time for each of you to share your plans and experiences bringing *Energy from the Sun* lessons/activities to your students and/or your teaching colleagues. Please do bring student/training samples, if you have any to share with the group.
